

# Conduct Road Pavement Construction

## AIM OF THE COURSE

The aim of this training is to impart to participants the skills and knowledge required to successfully conduct the construction of road pavement. The theoretical component of the program addresses the requirements of the specifications for construction and examines the placement, spreading, compaction and trimming of granular pavement materials.

The course is aligned to the nationally recognized unit *BCCRC3007B Conduct road pavement construction* which specifies the outcomes required including the set-out, the direction of plant for the placement, spreading, compaction and trimming of granular pavement materials and the post operation clean up.

## COURSE CONTENT

This course addresses the following elements:

- Construction terminology
- The nature of soils
- Specifications for construction
- Preparing the formation
- Importing materials (including spread rates)
- Control of moisture and mixing
- Laying out and initial compaction
- Shaping and trimming

## DURATION

The course is presented as a 1 day classroom based theoretical training program followed by a knowledge assessment, with the option of additional in-field activities incorporating performance assessment.

## PREREQUISITES

Basic english literacy is required.

## ACADEMIC AWARD AND RECOGNITION

Participants who complete the 1 day theory component will receive a **Certificate of Attendance**.

Upon successful completion of the optional in-field activities and the on-the-job performance assessments a participant will be issued with a **Statement of Attainment**, which will be recognised nationally.

## WHAT TO WEAR

All course participants are required to wear appropriate work attire.

## WHERE IS THE TRAINING CONDUCTED?

This theory session can be conducted either at our Midvale Training Centre or at the workplace for corporate clients. The practical component is delivered at the clients' worksite, a current 'in progress' road construction project.
