Australian Training Management

RTO No. 2431

Our Capability

For your success

ABOUT US

Australian Training Management is a West Australian owned and operated Registered Training Organisation (RTO Provider Code #2431 under the Australian Skills Quality Authority). We are specialists in the design and delivery of high quality, cost-effective training solutions – for your success. We champion safety, quality and flexibility – making it simple to manage training for individuals or large companies.

Australian Training Management was established in 1989 to provide specialised training in the earthmoving industry at a time when private training was scarcely available. Today, we're committed to quality of product and putting you - the client – first.

We maintain compliance with major regulatory authorities:

- Australian Skills Quality Authority (ASQA)
- Work Safe Western Australia
- Main Roads Western Australia
- Department of Transport (Western Australia)
- Civil Aviation Safety Authority (CASA)
- Department of Training and Workplace Development (Western Australia)
- Department of State Development (South Australia)

LOCATIONS *Both venues have training room and hire availability.*

West Swan Training Centre

52 Harrow Street
West Swan, WA, 6055 Australia

Five modern training rooms with ample breakout areas and full kitchen facilities. For corporate we also have a modern venue for corporate functions, training, conferences, meetings and more.

Our venue covers four hectares with a selection of training equipment and specialised high-risk training areas.

Jandakot Training Centre

2/35 Biscayne Way
Jandakot, WA, 6164 Australia

Three modern training rooms with ample facilities including a full kitchen and breakout and relaxation areas.

Both venues have training room and hire availability.

TRAINEESHIPS AND APPRENTICESHIPS

If you are an employer, you know that a well-trained workforce can increase productivity and bottom line within a business. Enrolling employees on a traineeship is an efficient and cost-effective means of developing staff, as employers can often receive financial support as the employer of a trainee or an apprentice.

Australian Training Management offer traineeships in Civil Construction Certificates II to IV, Mobile Cranes, Surface Extraction Operations, Resource Processing, Engineering, Driving Operations, Transport and Logistics. Apprenticeships we offer are in Belt Splicing (Polymer Processing).

RTO PARTNERING

It's costly and complex to start and manage a Registered Training Organisation, however, we can offer you all of the advantages by working in partnership with Australian Training Management.

An RTO Partnership is an arrangement where we offer you access to our suite of qualifications and we undertake all of the RTO-related training administrative and compliance work, allowing you to focus primarily on achieving your core business activities and goals. As an RTO Partner of ATM, you will be granted free access to the Mobile Assessment Platform.

MOBILE ASSESSMENT PLATFORM

Australian Training Management has developed a fully synchronised Mobile Assessment Platform (MAP) application specifically designed for conducting on-site assessment. The MAP is currently available for free download on Android, Apple and Microsoft devices through Google Play, Apple and Microsoft App stores.

OUR VISION

Our vision is 'to be recognised as the measure of excellence in the provision of training and business solutions'.

OUR MISSION

Our mission is 'to work with our clients by providing quality and flexible training solutions that will enhance their capabilities and business operations'.

OUR INDUSTRIES

Our flexible training schedule of short courses are fully integrated to meet evolving industry and business needs. This includes construction, plant operations, mining, resources, energy, aviation, transport and logistics, horticulture, business and high-risk work industries.

Civil Construction

When you're involved in the construction of public infrastructure, your workers must build safe and stay safe. Our White Card, Tilt Up Construction, Supervise Tilt Up Construction, Mobile Plant Operator, Working at Height, Confined Space Entry and Traffic Management training courses are essential to civil construction projects and the industry.

General Construction

Our construction training courses are designed to provide an occupational outcome and develop high-level skills for a range of support tasks. These courses are designed to upskill a Trades Assistant, Builder's Labourer or Construction Assistant.

Mining, Resources & Energy

Our mining, resources and energy training courses consider all aspects of preparing an individual for operational procedures. We offer a range of courses including plant operator, cranes, drilling, surface extraction, resource processing, engineering and drone operations.

Transport & Logistics

All of our transport and logistics courses are delivered in a realistic environment and provide you with the practical skills and knowledge required to successfully operate in the transport and logistics industries, such as forklift, heavy vehicle training, secure cargo / load restraint, pilot vehicle, fatigue management and chain of responsibility.

Aviation

Don't just learn to fly a drone - learn to fly it well and gain the CASA licenced certification required to fly for commercial benefit. In our drone courses, you will learn both the legal and practical requirements, including the skills required to fly safely and run your own drone business operation, including how to operate an aeronautical radio for aviation operations.

Related courses for each of these industries can be found at:
