ATM
Australian Training Management

CAPABILITY STATEMENT
RTO 2431 | WA owned for 35+ years

Practical, hands-on training that gets your people job-ready, compliant and safe.

ABOUT ATM

Australian Training Management (ATM) is a Western Australian-owned registered training organisation (RTO 2431) with more than 35 years of experience delivering nationally recognised training. We specialise in high risk work licences, plant and machinery operation, safety training and traineeships, delivered from our West Swan and Jandakot training centres in Perth and onsite at client workplaces across WA.

Our training is built around real equipment and real worksite conditions. Participants leave with practical skills they can use from day one, and employers get a workforce that is competent, compliant and safe.

WHY CHOOSE ATM

Small class sizes
Four to eight participants per course, so everyone gets more time on the equipment and more attention from the trainer.

WorkSafe WA approved assessors
High risk work licence assessments are conducted by WorkSafe WA approved assessors, supported by experienced, industry-qualified trainers.

CTF approved provider
Bulk billing through the Construction Training Fund reduces training costs by up to 70% for eligible construction industry participants.

Weekly scheduling
Regular weekly course dates, so new starters, upskilling and licence requirements are not left waiting.

West Swan training centre
Approximately seven acres of training grounds with cranes, forklifts, EWPs and a wide range of mobile plant on site, plus 10 classrooms.

Onsite across WA
Our mobile training truck delivers training and assessment at your workplace, in metro Perth or regional WA.

Mobile training truck
High risk licence, mobile plant and safety training delivered at your site, anywhere in WA.

Less downtime, no travel for your crew, and training in your own work environment.
